

Foam Exhausting Machine

Main Usage:

This machine is used for second time process for Unshaped/Immature Foam Blocks. It can extrude the Foam-Air-Holes to be closed and exhausted, to make the Foam Blocks more soft quality and more elastic quality.

Specification:

Working Foam Size:	W1000mm ~ W2150mm
Working Foam Height:	H0 ~ H350mm
Working Speed:	0 ~ 30m/min
Press-Roller Type:	Double Row(4/6Rollers)
Control Type:	Automatic Electric Control
Machine N.W.:	2500kg
Total Motor Power:	4kw
Floor Space:	L3000mm*W2500mm*H1800mm
